

How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and stopping points (see example to the right).
2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 8 (always round up). Post spacing for Trex is 8 ft. on-center maximum. Write the section count next to each line.
3. Total the # of sections (this will give you the # of steel frame kits and pickets to order).
4. Total the # of stopping points.
5. Total the # of sections + # of stopping points (this will give the # of posts and # of post caps to order).

■ Total # of sections = # of steel frame kits to order

■ Total # of sections + Total # of stopping points = # of posts & post caps to order

Steel frame kit includes: 2-Rail Brackets, 2-Vertical Front Rails, 2-Vertical Back Rails, 2-Horizontal Rails, 8-3/4" Self Tapping Screws, 42-3/4" Screws
